Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

sughrue@sughrue.com
PPROCESSING@SUGHRUE.COM
USPTO@SUGHRUE.COM

Office Action Summary

Application No.

10/541,848

Applicant(s)

OKU ET AL.

Examiner

THUAN D. DANG

Art Unit

1797

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 January 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 3-5 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) 1 and 3-5 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/22)
- Paper No(s)/Mail Date _____

- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 and 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Codignola (3,127,452).

Art Unit: 1797

Codignola discloses a process for hydrogenating styrene by passing upwardly a liquid containing alpha-methylstyrene and a gas containing hydrogen thru a packed bed of a solid hydrogenation catalyst (fig. 1; col. 1, lines 23-28; col. 2, lines 8-47).

The temperature and pressure of the reaction can be found on column 1, lines 30-34.

Codignola does not disclose (1) how much the superficial velocity of hydrogen gas is when it passes upwardly the catalyst bed and (2) the size of the catalyst (3) the mole ratio of hydrogen and olefin.

However, these are considered to be the parameters of the chemical process. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Codignola process by selecting appropriate superficial velocities and the size of the catalyst to arrive at the applicants' claimed process except that unexpected results can be demonstrated.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Codignola process to use an appropriate amount of hydrogen required to hydrogenate the olefinic bonds.

Response to Arguments

Applicant's arguments filed 9/8/2009 have been fully considered but they are not persuasive.

The argument that when the superficial velocity of the gas is lower than 3.0 cm/sec, the apparent reaction rate lowers, the superficial velocity is higher than 10 cm/sec, a pressure loss of the packed bed may increase, as a result, (1) yield is lowered

due to the tar formation and the catalyst is tear and worn, correspondingly is not persuasive since these results are expected due to the residence time of the reaction and the flow rate of reactants. When a reactant stays in the reaction zone more than the optimum time for the conversion to the desired product, it may be converted to undesired product or by-product in excessive amounts. In contrast, it is expected that an excessive flow rate of reactants will decrease the conversion of the reactants and may damage the catalyst as well as reaction bed.

In argument, applicants argue that in examples, Codignola uses a superficial velocity of gas outside of the claimed range of the same is not persuasive since the Codignola process is not limited by examples since it has been held that a disclosure in a reference is not limited to its specific illustrative examples, but must be considered as a whole to ascertain what would be realistically suggested thereby to one ordinary skill in the art. *In re Uhlig*, 54 CCPA 1300 376 F2d 320; 153 USPQ 460. Further, the superficial velocity of hydrogen (a main reactant of the hydrogenation process) is as defined considered to be a parameter of the reaction which must be selected to optimize the process. Assume arguing that the prior art does not teach about this parameter, one having ordinary skill in the art would select an appropriate superficial velocity of the hydrogen to operate the process at an optimized production of the desired product.

The present argument is very similar to any argument which applicants have before that the claimed process yields unexpected result due to the use of the superficial range of the gas. This argument is not persuasive since exemplified process is not the claimed process. Specially, in these exemplified process, only superficial velocity of the

Art Unit: 1797

gas 7 and 6.5 cm/sec are used. Any other response before is also included in the final Office action.

The argument that the superficial velocity of the gas is determined by the cross-sectional area of the reactor, reaction temperature, and the amount of gas passed per unit time, there is no guidance whatsoever in the prior art for one skilled in the art to select appropriate parameters to arrive at the applicants' claimed process is not persuasive since as discussed above, Even the superficial velocity of the gas is not mentioned in the reference, this gas is a main reactant in the hydrogenation reaction, one having ordinary skill in the art would select appropriate superficial velocity of the reactant to optimize the process.

The argument that applicants stand on the point that the **claimed** process yields unexpected results (it is incorrect as discussed by examiner above). In contrast, as discussed in the previous office action, the claimed process is not the process in examples. Therefore, assuming *arguendo* that the exemplified process yielded unexpected results (it is not true), this did not mean that the claimed process (totally different from the process in examples) also yields unexpected results since the exemplified process and the claimed process are operated under different conditions, using different reactants in the presence of specific catalysts, namely copper and palladium. It is reminded that evidence of unobviousness must be commensurate in scope with the claimed. *In re Kulling* 14 USPQ 2d 1056, 1058 (Fed. Cir. 1990); *In re Clemans* 206 USPQ 389 (CCPA 1980); *In re Dill* 202 USPQ 805, 808 (CCPA 1979); *In re Greenfield* 197 USPQ 227 (CCPA 1978); *In re Lindner* 173 USPQ 356, 358 (CCPA 1972); *In re Hyson* 172 USPQ 399 (CCPA 1972); *In re Tiffin* 171 USPQ 294 (CCPA 1971); *In re McLaughlin* 170

Art Unit: 1797

USPQ 209 (CCPA 1971); *In re Kennedy* 168 USPQ 587 (CCPA 1971); *In re Law* 133 USPQ 653 (CCPA 1962).

In conclusion, there are so big differences between the claimed process and the process disclosed in examples: (copper/palladium catalyst versus any solid hydrogenation catalyst); (a specific pressure, namely 1.0 Mpa versus any pressure); (superficial velocity of the gas at 6.5 to 7cm/sec versus 3 to 10 cm/sec); (a specific temperature, namely 180-200°C versus any temperature). Therefore, it is incorrect to say that the superficial velocity effects to the **claimed** process since the claimed process is not the processes in examples. The examiner also notes the comparative examples in the specification in the consideration of the effect of superficial velocity on the reaction. However, it is noted that other variables are not kept constant, so that the change of superficial velocity can be compared. It has been established by the patent law that the cause and effect sought to be proven is lost here in the welter of unfixed variables. *In re Heyna*, 360 F.2d 222, 228, 149 USPQ 692, 697 (CCPA 1966). Applicants are also reminded that it has been established that evidence of unobviousness must be commensurate in scope with the claims. *In re Kulling* 14 USPQ 2d 1056, 1058 (Fed. Cir. 1990); *In re Clemans* 206 USPQ 389 (CCPA 1980); *In re Dill* 202 USPQ 805, 808 (CCPA 1979); *In re Greenfield* 197 USPQ 227 (CCPA 1978); *In re Lindner* 173 USPQ 356, 358 (CCPA 1972); *In re Hyson* 172 USPQ 399 (CCPA 1972); *In re Tiffin* 171 USPQ 294 (CCPA 1971); *In re McLaughlin* 170 USPQ 209 (CCPA 1971); *In re Kennedy* 168 USPQ 587 (CCPA 1971); *In re Law* 133 USPQ 653 (CCPA 1962).
